## **SUMMARY/BACKGROUND:**

The following summarizes the key findings of community input received through the survey from November 15 to January 5, 2025, regarding potential amenities and improvements for the recreational area, reflecting the diverse needs and aspirations of the residents. The Cedarwood survey summary shows that most participants live within city limits and a 10-minute walk of Cedarwood, are aged 35-54, and have minor children. Community members suggested a variety of amenities aimed at enhancing the inclusivity, modern design, and functionality of Cedarwood. Key proposed facilities include:

- Roller Skating
- Restrooms and Picnic Tables
- More Trees and Shaded Benches
- Improved Parking Solutions
- Safe Pedestrian Access
- Interpretive/Educational Zones

Some of the suggestions are not feasible at this site and other suggestions are coming in future projects, so staff prioritized the following items for additional public input:

- Splash Pad
- Basketball Court
- Picnic Shelter
- Covered Area
- Interpretive Signage
- Sensory Play Areas
- Trees and Shade
- Restrooms

The Cedarwood community is eager to see improvements that cater to both local neighborhood needs and broader community development goals. This report highlights the diverse range of suggestions and priorities expressed by the residents, providing a foundation for further public input and planning. The next steps are to award a design contract to conduct feasibility and public outreach to help guide future efforts to bring recreation to this site.
